

Content Guidelines

These Content Guidelines serve to set a regulatory baseline concerning the use of the editor and what you're allowed to write in it. It's easily summarized:

Use the Resolution Editor for what it's meant to be used for: **writing resolutions**. That alone sets the standard at a pretty high level. Like most laws try to incorporate, just use your **common sense**.

Here are some things you should/shouldn't do with the editor:

Good

Resolution content

Conform to the conference's rules for resolutions

Don't insert your own punctuation at the end of clauses; the Resolution Editor will insert these automatically and absolutely correctly!

Alert authorities about violating content or users

Help other users with the editor, tell them about these guidelines if they seem uninformed.

Not Good

Profanities, Insults

Inappropriate or offensive content or anything else nsfw

Bypassing of filters or restrictions

Off-topic content (Not resolution related)

Links to phishing sites or similar

Individual self-promotion (outside of political context)

Spam, Advertisement or Vandalistic content

Content that intentionally makes it hard to process in the workflow

These guidelines may change without notice and are subject to interpretation by the administration.

Made for MUNOL

Created in need of a better way of formatting and distributing resolutions for MUNOL.
